MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE100010	The "Create Environment" button is inactive when trying to provision a 30-day AWS environment.	246858
DE100096	Intelligence Server crashes when exporting a document to PDF with embedded fonts.	245945
DE100118	ESRI map bubble size does not change depending on the values of metrics in 10.11.	247472
DE100132	The affinity lines in Google Maps are displayed in the default color even after defining and meeting the threshold condition to change it.	248077
DE100146	In Web 10.4.6, an error occurs when publishing an imported data cube.	231347
DE100207	Continuous waiting screen appears when launching the Narrowcast Administrator console.	247625
DE100209	User cannot open a Mobile application on Android when using a link from an HTML container in a document.	248070
DE100240	In Web 10.4.5, an error occurs when publishing a cube imported from Excel.	247250
DE100252	Inefficient SQL statements in Enterprise Manager are slowing ETL data load jobs on Oracle.	231998
DE100270	In Desktop 10.8, users cannot access files using a live direct database connection.	247098
DE100273	After removing badges and keys from Usher, the Usher badge reader still permitted badge access.	248360
DE100288	When configuring an Intelligent Server from Command Manager in 10.11, some LDAP configuration options do not work.	247171
DE100326	The "MicroStrategy Dataset Connector for Power BI" community data connector does not display the "My Reports" folder to select a dataset from.	247920
DE100373	The execution time of a large dataset takes a long time on ODBC layer when fetching data from Snowflake DB.	244814
DE100387	Integrated Authentication credentials do not register after upgrading from Library 10.4.8 to 10.11 .	237873

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE100440	In Web 10.11, the Unset button does not clear selected filters from Report Service Documents.	246379
DE100445	Web and Library have different titles for the same settings under the PDF export option.	248356
DE100463	Loading a derived metric with automatic sort-by, and containing another metric twice causes Intelligence Server 10.11 to enter an infinite loop and crash.	247824
DE100464	Usher app 10.11 does not prompt for new server configuration.	248406
DE100467	Windows Intelligence Server 10.3.1 terminates when refreshing an MDX Cube.	246859
DE100521	After upgrading to 10.4.7, users cannot run a report containing duplicated metrics in Mobile or Web.	247254
DE100538	User is unable to access Web, Library, or Intelligence Server using the Departmental environment.	246143
DE100569	In Enterprise Manager, using the attributes "Document" and "Security Filter" do not return data.	248662
DE100602	In Library 10.11, guest users cannot publish dossiers.	246320
DE100637	Intelligence Server crashes due to non-synchronous dummy units in the cube partitions.	248037
DE100668	Applying a security filter to a derived attribute may cause the Intelligence Server to crash.	248896
DE100716	After configuring the Usher Server, the port for client and server mutual authentication is not registering in Network Manager.	248628
DE100718	User does not receive Usher badge download email after configuration.	248629
DE100741	In Workstation, leaving a dossier running with auto-refresh results in increased memory usage without the ability to release discarded memory.	249092
DE100783	An error message appears when using the project creation assistant to create a new project with the proper privileges.	247588
DE100785	The option to unload a project is not available to Administrative Users from Developer.	

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE100786	Intelligence server crashes when importing an MDX cube in 10.10.	248450
DE100803	Enterprise Manager command ALTER DATA LOAD resets the enable/disable data load property incorrectly.	247231
DE100806	When a dossier has multiple pie charts using the same attributes, selecting an angle on a pie chart results in the corresponding area in another pie chart not to be highlighted.	249030
DE100829	If more than one user uses Workstation at a time, it crashes.	249172
DE100842	An error appears when using Integrated Authentication to connect to Office 10.11.	248785
DE100845	An error message appears when importing data to republish a data cube.	
DE100862	The search box selector does not render accurately with its target in Mobile.	246117
DE100882	Importing an .mstr file into an existing dossier converts metrics and attributes in the schema into managed objects.	249368
DE100886	User is unable to configure out-of-the-box custom SAML for Library 10.11 with JBoss.	260347
DE100888	Web may contain security vulnerabilities regarding session cookies.	244381
DE100899	Intelligence Server crashes due to multiple threads job execution.	247732
DE100953	In Web 10.4.7, the attribute elements selected from the prompt of an executed document are missing from the selector.	239492
DE100977	In Web, exporting a report in Outline Mode to Excel results in inconsistent data formatting.	243011
DE101039	Connecting to Presto via HTTPS fails with Web and Developer.	249468
DE101043	Intelligence Server crashes unexpectedly due to an empty LDAPDN.	248329
DE101072	Wording of Export PDF Settings in Web and Library is inconsistent.	248355

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE101083	In Developer 10.10, a New Metric with a prompt in its definition cannot be saved.	249729
DE101087	Intelligence Server may fail when run by a user with assigned security filters.	248896
DE101089	Intelligence Server crashes due to a concurrent access request to a shared memory buffer.	
DE101182	When a derived attribute is defined by two attributes existing in multiple datasets, the derived attribute values do not appear on a dossier.	246532
DE101208	In Web, after a Dossier is executed with a grid report containing a nested prompt and "save this answer when report is run" is enabled, the second nested prompt page is displayed twice.	249967
DE101214	It is impossible to go back to the previous screen in Dossier after linking into a specific sheet or panel.	249404
DE101216	Android application may crash when executing a specific document from the home page.	249331
DE101243	Developer client stops responding when viewing projects from System Administrator.	233003
DE101245	User cannot display all columns, including excluded columns, after importing selected columns into a Multi-Table Data Import cube.	250016
DE101368	"Add new data" publishing mode with data wrangling does not work.	
DE101388	Inserting string data into intermediate tables in Impala results in "Possible loss of precision" error.	248531
DE101391	An error message appears when transferring Date data type values from Exadata to Hive.	248608
DE101425	Locale error appears in DSSErrors.log after running a report or a document.	204291
DE101487	Data does not appear when filtering a Dossier by an attribute based on Salesforce ID or Desc.	250359

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE101534	Launching a Compliance Dossier with multiple environments returns incorrect data.	250299
DE101545	Executing a document with a custom visualization, such as a D3 Waterfall chart, results in a blank space on a document viewed on an iPad with 10.4 Mobile server.	246070
DE101598	In Mobile 10.11, running a Report with one required object prompt and other optional prompts will fail if all prompts are not answered.	240293
DE101636	In Library Admin, entering the Web URL to configure single sign-on returns an error.	249887
DE101671	Sample Dossier contains a visualization which is not deployed.	250677
DE101689	Although the Collaboration Server in Library works successfully, selecting Test Connection in Library Admin fails.	250705
DE101724	DSNs with names longer than 32 characters produce errors in the console mode Connectivity Wizard.	250747
DE101749	Hong Kong and Taiwan are incorrectly considered as countries in License Manager.	250778
DE101760	In Web, drilling down on a grid in a Report Services Document results in an error.	
DE101778	After upgrading to 10.10, exporting a document containing a prompt to a PDF reorganizes the prompt order.	248635
DE101849	After granting Denied All ACLs to a user for a DI cube object in Developer, Web does not reflect the correct ACLs.	250967
DE101917	User is unable to start the Intelligence Server after installing a Windows update on Windows 2012 R2.	250932
DE101964	Launching the 10.11 Android Platform application results in an error message.	
DE101967	User is unable to save a new or existing metric with the metric expression "Max()" in Web and Developer 10.11.	250614
DE101969	Using the Web-only install of 10.11, launching the Configuration Wizard results in an error.	248441
DE101970	User cannot configure SAML with Library using a specific IdP Metadata file.	249326

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE101986	In Library 10.11, SAML authentication files are missing.	251231
DE101991	Enterprise Manager data loads frequently result in an ODBC error.	251260
DE101995	Command Manager displays full names when creating users, but displays login names when deleting users.	245611
DE102040	Filter modification is not possible when a dossier is run in embed=true mode.	240792
DE102043	Photo Uploader Widget does not work on Android.	251249
DE102052	Intelligence Server crashes when a user saves a view filter based on a null element for a second time.	251303
DE102062	When running a document with a heat map on an iPad, the text "Absolute value of" is not translated after setting the language to Spanish.	247834
DE102071	Running Sum metrics with an Attribute Group illustrates incorrect values on a bar chart, but correct values on a grid.	251201
DE102103	Intelligence Server crashes when copying folders containing a document with Color By set for a consolidation object but set as attribute in Web.	251278
DE102113	Page preview in SAS data imported from disk displays Korean characters incorrectly in Web 10.10.	251520
DE102172	In Enterprise Manager, data load fails while migrating IS_REP_SQL_STATS.	251623
DE102197	Deleting a user in Web results in an error.	250957
DE102225	User is unable to search for the components of objects in Command Manage.	249094
DE102241	Pass-through authentication does not work for database views.	249296
DE102280	The automated notification emails after creating a file subscription are sent to the user's default address rather than the addresses given in the command.	247511
DE102310	Copying a dashboard in Web results in an error, but the user can dismiss it without consequences.	250946

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE102419	Duplicating a project does not end in a pop-up window informing that the Project Duplication ended successfully in 10.4.7.	249891
DE102529	Custom ImageLayout shapefile does not work in Desktop 10.4.	247035
DE102575	Listing the logical table location using Command Manager displays the path differently from other objects in MicroStrategy 10.4.	248687
DE102581	Threshold is not correctly applied to an Attribute Column.	251340
DE102586	Refine Server uses an outdated Java library, which may lead to security vulnerabilities.	251602
DE102613	Schedules for Subscriptions settings are not updated when replacing a report object with a newer version.	250262
DE102643	In 10.11, selecting a branch results in a slower query than selecting a node.	250290
DE102713	LIST ALL SECURITY ROLES FOR GROUP does not return data for the subgroup of the subgroup in 10.4.	252140
DE102770	In a dossier, a map visualization displayed with the physical map style does not render when a user zooms in on the map.	252535
DE102841	Using an empty file instead of a .pem file allows to connect to a server in the Android app.	252229
DE102846	Hidden content in the website infrastructure may result in security vulnerability.	252714
DE102921	When exporting a dossier, the ESRI map visualization does not resize correctly on the details page.	252085
DE102952	In Mobile 10.11, when the Disable Email key is set to True, users can still open the Mail Client application using href in an HTML container.	252835
DE102973	Project images are not appearing in the Web 10.11 Sandbox.	252298
DE103013	After confirming options are selected in the advanced settings of Statistics, data still does not insert into the STG_IS_CUBE_REP_STATS table.	247261
DE103047	Narrowcast Server crashes unexpectedly when executing subscriptions.	252911

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE103068	In Web, an error appears when wrangling data imported from Excel.	226858
DE103086	The yield function produces null values when the coupon rate is 0 in MicroStrategy 10.4.	246089
DE103150	Subscriptions may fail when running simultaneously.	252668
DE103214	Reporter privileges do not allow users to create Derived Metrics in a Dossier.	252645
DE103369	Web does not include a search functionality in the dropdown style filter.	116044
DE103372	User is unable to change search box selector settings to auto-submit.	195104
DE103389	Task API logout task behavior differs between 9.4 and 10.11.	252992
DE103449	Using a graph as a selector for a grid when selecting the first attribute element in a Report Services Document results in an error.	253005
DE103545	An error message appears when trying to connect to the warehouse catalog with a SQL server.	204338
DE103553	REMOVE ATTRIBUTEFORMEXP command does not work in 10.9.	
DE103750	In Solaris, when all Performance Counter logs are enabled on the Intelligence Server, system memory information can be duplicated or ignored.	231688
DE103769	After upgrading from 10.5 to 10.11, the filter drop-down selector box has smaller dimensions in a document.	251046
DE103945	After applying the Excel template "MSTR7ToExcel-WithoutColumnAxisHeaders," column headers remain in the subscribed Excel file on Narrowcast Server.	248525
DE103967	After renaming a Data Import Intelligent Cube, the new name is not reflected on a View Report.	251170
DE103975	Threshold colors set on the HeatMap Widget do not appear on an iPad.	252703
DE104163	iOS VoiceOver does not respond correctly when browsing through folders.	

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE104189	On iOS, using swipe on a mobile dossier to select a panel results in a delay.	247005
DE104224	An error appears when drilling down on a grid in Web 10.6.	251666
DE104248	The report headers are out of alignment when the "Lock Column Headers" option is applied in Web 10.11.	244371
DE104256	Administrator password does not work during upgrade from MicroStrategy 10.10 to 10.11.	246388
DE104360	Derived metrics with an internal rate of return for payments at irregular intervals (XIRR) function appear blank in a dossier.	253286
DE104424	After successfully executing the dossier in Aqueduct, the downloaded .mstr file fails during execution.	254660
DE104497	In Object Manager, users are unable to replace the schedule settings on a report when migrating schedule settings to another environment.	250262
DE104498	Search selectors on report service documents appear differently on Android than on iOS.	196313
DE104689	PDF exports of dashboards are unreadable.	253298
DE104701	The getLoginToken function does not execute on Internet Explorer 11 when the embedding sample is used cross-domain.	249105
DE104708	Duplicating a project from a 10.11 project source to Access DB results in an error.	254239
DE104748	Adding additional analytical threads for MicroStrategy I-Server 10.11. does not work.	254425
DE104909	Cluster monitor shows incorrect and varying statuses for all nodes.	255313
DE104920	Custom visualizations do not appear when using the 10.4 Mobile Base plugin.	250863
DE104940	In a document, the calendar selector allows users to choose a From/Start date greater than the To/End date.	255464
DE104953	Creating a dossier using a dataset with more than 200 objects loads the project's default drill map and returns an error.	230468

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE105006	Changing grouping selection results in random colors for totals and subtotals in grids.	250083
DE105050	Custom visualizations rendered as pure HTML cannot be exported as a PDF in a dossier.	255598
DE105066	After viewing a PDF outside of the iOS application, the automatic refresh no longer works when returning to the application.	251667
DE105087	The Production Web server may not be secure and vulnerable to threats.	255356
DE105089	After upgrading from 10.7 to 10.11, users cannot login using former 10.7 passwords.	255268
DE105117	After republishing a data cube, the data is not updated in any reports.	251133
DE105199	Upgrade retry fails as the CodeDeploy scripts are already existing in the location in 10.11 Critical Update.	
DE105221	Web document is displaying text incorrectly when using HTML delivery.	251409
DE105332	Deleting the attribute header in a grid also deletes the attribute form column next to the metrics column in Web 10.11.	254584
DE105390	While filtering a dossier, changing an attribute filter to the search box option returns an error.	255091
DE105510	User cannot edit documents converted from dashboards in Developer.	256187
DE105754	Reports are not visible in MicroStrategy Desktop when connected to an environment and adding new datasets	255998
DE105755	After 11.0 License Key changes, users cannot login to tools that check licenses.	
DE105912	In Web, running a dossier containing a heat map results in an error.	254445
DE105941	MicroStrategy Logo does not appear at the top of emails when inviting users to view a dossier.	256358

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE105983	The Merge Execution step in System Manager hangs if there is a success or failure path from Split Merge that does not ultimately reach the Merge Execution.	255122
DE106141	Data import from SharePoint to Web does not work.	250426
DE106369	DSS Errors log is filled with "Server Lock Order Violations" while there are no application errors.	250297
DE106410	Horizontal selectors in documents have vertical scrollbars when rendered in Library.	254394
DE106414	In 10.11, Report Service Documents render differently in Library than they do in Web or Mobile.	254394
DE106447	Refreshing a cube results in an error in 10.11.	256783
DE106663	Panel positions in a Visual Insight dashboard change unexpectedly when clicking the back arrow.	257093
DE106682	In Developer, when "All Objects" is selected, searching for configured objects does not return results.	257135
DE106813	Intelligence Server crashes when duplicating the resolution question.	257103
DE106836	Differences between Enterprise Manager project 10.3 and 10.10.	256283
DE106858	When deleting objects with dependencies, Developer 10.4.7 does not open the "search for dependent objects" window automatically.	257123
DE106921	Low memory setting in DSN leads to "GC overhead limit exceed" error when connecting to MongoDB.	256614
DE106929	Multiple columns are used to represent a single grid column after exporting a Report Services Document to Excel in MicroStrategy 10.x.	257406
DE107221	Dynamic date calendar selector works correctly in Web, but not in Mobile.	257187
DE107242	Google Map option is visible in the dossier Format panel even if there is no Google Map key configured.	
DE107331	In Library and Web, double-clicking on a text visualization causes dynamic text code to appear in presentation mode.	257664

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE107643	Using colored values in Dossier does not work.	257755
DE107658	In a multi-layout Report Service Document with transactions configured, some transactions are not writing back correctly to the MySQL database.	257749
DE107756	Library redirects to 8443 when 8080 is the configured HTTPS port.	258172
DE108218	Security filter is not properly applied to a user.	257327
DE108374	Landscape-only documents rotate to portrait mode when the annotation is triggered on Android.	258268
DE108400	In offline mode on iOS, adding a smart client to the calendar selector causes the application to freeze.	124112
DE108690	After upgrading to Web 10.11, the "Send Now" feature is unable to send reports and documents to multiple user recipients.	258066
DE108856	Adding more than one attribute to the "Date Attributes" drop zone results in an error.	258670
DE108883	When running a document in presentation mode, selecting an image containing a email hyperlink causes the image to load without success.	258461
DE109115	There is insufficient disk space on the Developer server.	259120
DE109332	On Mobile, the length of the label on a slider selector does not auto-adjust with content on an Android 8.1.	258290
DE109367	User is unable to install the collaboration feature on RHEL 6.7.1 due to a glibc version error.	258600
DE109591	Shape files and definitions within configuration files are being distributed without consent as part of the Library server.	259667
DE109718	The axis formatting is switched in a histogram when all attribute elements are selected in a visualization filter in Web 10.11.	258946
DE109723	There is an error in 10.11 install log and Redis fails to be installed.	259458
DE110582	There is a referral error when trying to open Configuration Wizard or Service Manager in 10.4.8.	258277

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE111302	After installing 10.4.8, saving a report results in an error.	260778
DE111852	Using Eclipse Jetty 9.2.9 may result in security vulnerabilities.	259282
DE112250	When terminating an environment, the space bar does not work in the dialog box that prompts you to type the environment name.	262054
DE112880	Exporting a report with thousands of shared formats to a PDF causes it to load indefinitely and throw an error.	262251
DE112953	Developer 10.9 crashes after applying Windows security update.	261025
DE112978	User cannot terminate environments containing spaces in their name in MicroStrategy on AWS 10.x.	262698
DE113070	Running 10.4.8 on a Microsoft Server 2012 R2 may result in a Narrowcast server crash.	263048
DE113298	Running Platform Analytics on a Linux machine without Java 8 installed results in an error.	263385
DE114130	White screen appears after authenticating via SAML into Library 10.11 app on Android.	263202
DE12014	Text appears cut off after a Report Services Document containing a text box with multiple pages of text is exported as a PDF.	252166
DE12567	In the Mobile dashboard, the order of the columns in a horizontal bar graph appears differently than in the Web dashboard.	
DE18402	Dragging and dropping multiple attribute/metric selections produces unexpected behavior.	
DE19783	In Web, merged cells become unmerged after exporting to Excel.	
DE19816	The MicroStrategy Repository Translation Wizard cannot export translations.	
DE20109	Outline Mode is not retained when exporting a Grid in Outline Mode to Excel in a document.	
DE20303	When the attribute form format is set to URL, the URL will not execute in Mobile.	

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE21626	If an attribute contains Null elements, excluding non-null attribute elements in a filter or in-canvas selector will also exclude Null elements.	
DE22880	An undefined error message appears when running the "Dashboard & Document Usage Analysis" OOTB document in Enterprise Manager 10.x.	
DE22941	Creating connection maps programmatically across multiple projects will result in one of those projects not applying the connection maps.	103707
DE24247	Job monitor does not display more than 1024 jobs in the Enterprise 10.1 queue.	
DE25048	In-product help information about connectors in 10.1 is not up to date.	
DE27528	When starting Enterprise Manager from the command line, the command line does not show typed in commands after './mstrctl -s EMService start' is run on Linux.	
DE27837	An error message appears when running dashboard and document usage analysis in Enterprise Manager Project.	
DE29239	In Web and Developer, a report executed with a View Filter excludes Null values.	
DE29332	Smart Metrics displaying incorrect percentages.	
DE29347	After upgrading to 10.1, users cannot easily revert to 9.3 SQL.	
DE32344	User cannot type elements in the drop-down selector in presentation mode on Web 10.2	
DE33699	Users encounter multiple issues when applying gradient colors to thresholds.	113983
DE33933	Usher notifies users of the proximity detection from a beacon every four minutes, even when the location has not changed.	114640
DE34729	If an attribute contains Null elements, excluding non-null attribute elements in a filter or in-canvas selector will also exclude Null elements.	
DE36148	Mouse wheel does not work in Report filter in Internet Explorer 11 in 10.3.	117967

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE36667	Other grids or widgets are still visible after maximizing a DHTML widget.	120654
DE37654	Customer is experiencing Issues converting imported cubes and documents from 9.4.1 to 10.2.	120310
DE38122	Attribute groups containing shortcut metrics display incorrect values on a graph, but correct values on a grid.	125807
DE38442	Kerberos authentication with Impala and LDAP does not work on a Linux environment.	125479
DE38701	View Filter on an attribute excludes NULL values after upgrade to 10.3.	127004
DE39873	JVM crashes when importing a SAS file larger than 2 GB.	
DE41840	In ESRI Map, a custom shape created in Korean text for a GEO attribute appears in English.	135240
DE42503	The Web preference Keep Parent while Drilling does not work when enabled on a Visual Insight dashboard.	133921
DE42510	On Android 10.4, the rank metric qualification selector does not display the correct selector items.	137353
DE43226	Error occurs when trying to create an MDX report in Developer.	133650
DE43300	User in Developer is able to view the Change Journal in Developer after the privilege was disabled.	138473
DE44093	Prompt answer is not passed after saving the document with "Do not show prompt page."	135210
DE44627	Encountering inconsistent cube publishing issues from one day to the next.	129053
DE46111	User cannot export a report to HTML without title and page-by information.	145131
DE47257	Grouping and metric display incorrectly in Desktop and Web dashboard.	147058
DE48124	It is impossible to save an image hyperlink in a document.	143869
DE4837	When data labels are in bold font, the reference line labels move to the right of the visualization.	

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE48947	In Enterprise Manager 10.4, adding an attribute ID form in a Freeform SQL Report returns an error.	133343
DE5030	Data labels do not appear on a bar chart if there is an attribute in the color-by section and the subtype is marked as Stacked in a dashboard.	
DE51264	Usher users can only select their first badge after integrating the Usher SSO Library into their mobile app.	156107
DE52123	After uploading a MicroStrategy file into Desktop, adding the "Row Count" metric to Columns results in an error.	159613
DE53206	The Keep Only and Exclude options do not work as expected on Chinese/Korean/Japanese elements in Desktop and Web, with a live connection to the database.	231493
DE53318	An error message appears when importing a custom date range from Google Analytics.	163078
DE53506	LIST ALL EVENTS in Command Manager displays English Event name in a Japanese environment in 9.5.1.	161050
DE54260	Search for Metrics in Web does not include long description strings.	144005
DE54553	English Name is displayed when executing LIST MEMBERS statement in Command Manager 10.4 with a Japanese environment.	161051
DE54878	When using Web on Internet Explorer 11, double-clicking the "Shared Reports" icon causes the folder list to become misaligned.	167589
DE55249	Created a package using Web SDK and the conflict resolution is ignoring the flag set and showing USE EXISTING.	168458
DE56123	The drop-down filter on a dossier in Web 10.2 does not appear if the web browser is zoomed in to 125%.	169650
DE56182	After executing a Report in Web 10.4, the browser scroll bar does move in Internet Explorer 11.	166476
DE56668	When a displayed attribute form is set to custom, the search-box selector returns all attribute forms in Web.	171437

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE56678	Attribute forms created in Developer are not displayed in Architect.	171272
DE56931	ScanMD log does not show the number of total errors.	166279
DE57358	Custom format for metrics is not taken into account for some dashboard graphs.	172892
DE57987	User is able to save reports in a shared folder even without necessary permissions.	134675
DE58464	Web 10.7 incorrectly throws an error that states that a cube is not published.	175921
DE59163	chkconfig functionality is hindered when init.d scripts contain reference to /dev/tty.	177330
DE59299	User is unable to specify the encoding when exporting data to a .csv file in Dashbord in web.	177901
DE59312	Using Command Manager to change a project description does not work.	164063
DE59327	Documentation for linking a dataset is outdated.	178389
DE59336	User cannot link two datasets via live connect.	172646
DE59406	After resizing grid columns, the wrong tooltip appears on the column headers.	177636
DE59410	Metrics removed from a visualization still appear in the join behavior settings in the visualization options.	178698
DE59793	Users cannot modify threshold values for percentage metrics in the Simple Threshold Editor.	179325
DE59947	In a report, moving the cursor to the right with Tab makes the column headers disappear in 10.4.	171265
DE60196	Sending an email containing a document through Distribution Services does not render correctly.	175684
DE60568	Show All option is missing when the filter has a Custom Group as source.	179805
DE60624	Web.config file for ASP does not include HTTP security headers.	181058

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE61040	In Web 10.4.2, the "Related Reports" panel appears on the Report execution page.	181067
DE61517	Cube publishing fails during data import in Web for Splunk databases where the imported data/table includes a _time column/field.	181080
DE61563	The command "List all Jobs" in Command Manager shows different values for Job Status than Job Monitor.	178556
DE62601	The tooltips on a bar chart do not appear if an in-canvas filter is applied in Dossier.	184346
DE63029	When renaming a column in Web, it is impossible to see the original header.	184969
DE63147	The Exclude Weekends filter option is not working in MicroStrategy Web.	184733
DE63281	The Metric Editor concatenates formulas when using BETWEEN and AND keywords.	185340
DE63580	Objects not found error occurs when previewing an Incremental Refresh Report based on Xquery Cube.	184413
DE63590	Creating a derived attribute or metric from data containing a decimal point returns incorrect values in a dashboard.	185269
DE63844	The derived attribute based on metric is not filtered properly when the result is decimal, unless with functions to make the output in fixed number.	185270
DE64240	Desktop does not allow database passwords that contain ampersands.	187044
DE64484	Export option "enclose each data item with" in Developer 10.7 does not take effect when exporting a .csv file from Web.	187031
DE64706	Graph is unable to show the target for a custom group in Web.	185138
DE64893	User Manager for Web Intelligence Server Administrator page has limited search results and no option for granular searches.	188210
DE65378	When listing document cache properties, Command Manager results are missing the creator.	189577

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE65597	Renamed metrics show the original name when adding an attribute from a different dataset in Dashboard Visual Insight 10.4.]	190224
DE65757	Dashboards with auto-refresh enabled stop without any error, warning, or feedback when the web server stops.	190666
DE66059	MicroStrategy Architect hangs while switching views.	188934
DE66766	Project Configuration Script in Command Manager does not apply changes in 10.5.	192356
DE66884	Date format d/m/yyyy is unavailable when region is set to English (U.S.) in 10.4.1.	189517
DE67502	Document title does not appear in the navigation bar on the prompt page in Web when the document is run in export to Excel mode.	194500
DE67695	R functions are not available after installing MicroStrategy R integration Package.	164302
DE67944	When an MMP package is migrated using Command Manager, the modification time of objects is not updated.	194841
DE68460	The Metric editor tools in Developer contain an incorrectly translated option when the Interface Language is changed from English to Spanish (10.8).	194878
DE68461	Increasing the font size of an attribute column takes too long in 10.8 and 10.4.3 in web.	
DE68700	In Command Manager, running the command "CUSTOMER_ID" results in an error.	
DE68752	Norwegian product help not available for MicroStrategy Web 10.8 when using locale 1044.	196619
DE69086	Menu options are not translated correctly to Spanish in Developer.	194878
DE6929	In Mobile 9.4.1, the gauge graph is not rendering consistently with the gauge graph in Web.	
DE69436	Using a grid with locked row headers as a selector in interactive mode only highlights the first element selected, even after other elements are selected.	197381

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE69789	Element Count in Report Filter shows an incorrect number of selections in 10.4.	196795
DE70048	Modifications have been made to prevent session fixation attacks in MicroStrategy Web.	194916
DE70066	Dataset names of derived metrics with the same name in different datasets do not appear when selecting advanced conditional formatting options in Developer 10.4.3.	197350
DE70463	Publishing an Intelligence Cube against SAP BW, causes SAP BW to allocate 16 GB memory or more in 10.2.1.	199018
DE70593	The error message displayed after failing to publish a Multi-Table Data Import cube is not helpful enough.	180213
DE70605	Web executes XSS stored as additional text in a dossier.	
DE70694	After duplicating the project "QA MIS lead," the settings in the duplicated project are not the same as the original.	175730
DE70887	Modified State.csv file with Spanish data inside causes Intelligence Server to crash.	195549
DE71684	The preset configurations in the Mobile Application are not applied on Android devices with the correct branding.	198624
DE71922	Dates appear incorrectly when importing a csv file containing German formatted dates.	201290
DE71991	In Web 10.4, exporting a Document to Excel does not display the visualization properly.	201498
DE71995	The option Flash (deprecated) in the Export dropdown menu in Web document is truncated.	200206
DE72346	The option to republish an Intelligent Cube is available in Dossier even if a user does not have necessary permissions.	198248
DE72406	The logging example in the R Integration Pack User Guide does not include a close function, per R best practices.	201933
DE72680	Prompted documents do not render correctly when running in offline mode in Mobile 10.10	202401
DE72683	Data from SAS files are missing after uploading the files to Web 10.7.	202296

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE72685	In Developer, under device settings, using SFTP protocol returns an error.	202561
DE72791	Incorrect SQL results in incorrect data against SAP HANA Calculation Views containing parameters.	202292
DE73045	Copying and pasting a validated metric formula into a new metric causes the new metric to fail in a dashboard.	157009
DE73089	In Web, an attribute with an HTML tag appears incorrectly in a prompt, but correctly once selected in a grid.	202870
DE73237	In a dossier, the container's outer border and other format properties are not applied.	
DE73427	User is unable to modify or rename a derived element.	184890
DE73532	In Visual Insight, Copy and Paste of Visualizations Resets Layout in 10.4.2.	202754
DE74089	Metric slider not being changed by selectors.	180424
DE74097	Dossier metrics are unable to change to Wingdings 2 or 3 font when applying a threshold.	203947
DE74306	Passing the metric selector values between dashboards does not work in MicroStrategy Mobile.	201760
DE74390	User is unable to update table structure or import tables in Warehouse Catalog when connecting to Enterprise 9.x database in MicroStrategy Developer 10.2.	201077
DE74467	The example value for POST body in Dataset API does not work.	204856
DE74752	In Web, when users create a database connection using Data Import and do not share the connection, the shared icon still appears by the connection.	203055
DE74877	Server-Side Request Forgery (SSRF) DNS lookup uses server URL API parameter.	205080
DE75026	When creating a Custom Group in Web, the Select Attribute option in the condition editor does not produce correct answers.	202679
DE75055	When users open a PDF from My Page in MicroStrategy Web, it loads in the same window.	188076

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE75078	Compound metrics (with filter) containing facts return no data when opening a downloaded .mstr file in Desktop.	205238
DE75394	Selector values are not passed on from one document to another document or a report when, by default, all the elements of a selector are selected.	206083
DE75437	When users drill down to cities, from states, in a map visualization, markers appear for cities in other states.	206171
DE76134	Dynamic aliasing stops working after user moves a metric in a grid in Editable mode in MicroStrategy Web 9.4 and 9.5.	203482
DE76268	In Web, when the home page is set to My Page, closing a document containing an HTML container does not return the user to the home page.	208392
DE76544	While using a License Key with unlimited users, an Out of Compliance message appears.	208300
DE76567	Changing the owner of the history list using the Alter HistorylistSubscription script reflects the new owner as blank in Developer.	209327
DE76570	The attribute qualification prompt does not work when default operator is changed to In List in Developer.	209595
DE76571	In Web, the Document HTML description does not save in the correct format when saving in Presentation mode.	209631
DE76578	The Hide Conditional Formatting option does not work on MicroStrategy Mobile 10.7 using iOS.	207249
DE76749	In 10.6, the WEBNUMBERFORMATTING privilege is not recognized in dossiers.	
DE76796	Occasionally, when users switch between tabs in MicroStrategy Web, the new tab does not render.	203422
DE76872	If a user does not have the "Create Schema Objects" privilege, they can read a dashboard with derived attributes created by another user but cannot save their own version of the dashboard.	210824
DE76920	Nothing appears in a Visualization when using specific SHP file columns to draw map shapes in 10.7.	210881

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE76930	If a user does not have the "Create Schema Objects" privilege, they can read a dashboard with derived attributes created by another user but cannot save their own version of the dashboard.	210824
DE76966	User is unable to schedule cache update for dossiers from the Web interface, since there is no HTML5 option for Delivery Format, unlike Developer.	
DE77119	Web does not export graphic reports to HTML correctly.	209992
DE77120	Command Manager 10.9 lacks a Show Feedback Option for the navigation bar in Web Preferences.	211277
DE77170	When saving a duplicated project in a Chinese environment, selecting the "Use Existing" option for "If a User or Group from Source is Found in Destination" will save the project with the "Replace" option.	210388
DE77359	Subscription IDs for embedded URLs change after closing the Share Editor.	
DE77362	In MicroStrategy Web, the Login dialog does not appear if a your user session times out and you are not logged into a project.	211550
DE77436	Allowing automatic login if session is lost does not work when a user is inside Dashboard in Web.	211624
DE77539	There is an unnecessary "Segment this document" GUI setting in Web 10.4.	211543
DE78088	In Command Manager, the command "List all Projects for Cluster" returns the server definition instead of the server name.	213926
DE78098	The "Features for customer feedback" option in the Web User Preferences do not work correctly.	211505
DE78226	Save icon does not display in Presentation mode.	211663
DE78269	Legends do not display fully in graph visualizations on iPads even when fully expanded.	213554

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE78289	ESRI Custom Shape does not render correctly when different geo roles, such as city and county, share the same name, or there are two cities with the same name, but in different counties.	205351
DE78297	User is unable to add contacts whose names contain an ampersand to Contact Groups via Command Manager.	212146
DE78298	The number format for longitude and latitude values in iOS 11.0.1 is incorrect in French.	210887
DE78469	Blank negative values are inserted in Excel Pivot Table with MicroStrategy Office 10.8 and 10.4.5.	202216
DE78635	JavaScript error message appears in MicroStrategy Web when opening the top left menu that contains a list of projects.	215516
DE78829	Users cannot maximize or export visualizations in Library, using presentation mode, when the title bar is hidden.	
DE79067	When the MicroStrategy Web language is set to English, any new folder created from My Page appears with a number 7 at the end of the new folder name.	216250
DE79121	Distribution service reports are not generated the first time that they are run using Command Manager via the job scheduler tool.	208675
DE79358	ESRI Map does not display countries containing special characters in a document.	215860
DE79417	Legends of the stacked bar charts lose their coloring preference after upgrade from 10.3 to 10.4.	208089
DE79655	It is possible to delete a database connection even when it is used in project configuration in 10.4.	216017
DE79692	In a dashboard with a cube, when filtering on attribute and adding a text as a filter, it does not show data when it should in 10.7.	217193
DE79716	When using reserved words inside strings, they only appear in uppercase.	216150
DE79722	When user shares a dossier from Library via the Invite Users button, the users do not always get the email notification in 10.9.	215743

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE80045	Web WAR file contains an outdated JavaScript Library.	216905
DE80071	In 10.7, the Intelligence Server crashes unexpectedly when vector is not initialized.	208948
DE80305	Some elements do not fit in a dashboard's drop-down filter when multiple selections are enabled.	218189
DE80312	Errors occur when saving drilled reports with an email as an attribute.	210559
DE80348	When an email address is added to the list of recipients, it does not immediately appear in the Available list.	217340
DE80493	Date formatting changes from MM.DD.YYYY to DD.MM.YYYY format during .csv file import.	210151
DE80557	MicroStrategy Office 10.4.5 does not use TLS 1.2.	217463
DE80594	The Info Window does not appear for a specific document & selection.	217786
DE80651	Converting a dashboard to a document, switching layouts, and triggering an information window results in a Missing Plug-In error in Web 10.4.5.	217394
DE80652	ESRI map images do not render after upgrading from 10.4 to 10.9.	215582
DE80681	In Mobile 10.3, default prompt answer cannot be carried over for second time using link drill.	149013
DE80883	Using the "between" condition in Custom Group Editor in Web does not work properly.	218299
DE80913	An error occurs after opening a document, for a second time, from an URL with an embedded argument for a prompt.	217868
DE81262	In Enterprise Manager, running "Dashboard and Document Usage Analysis" returns an error.	219394
DE81310	Comparing objects using Object Explorer 10.9 causes error.	216128
DE82091	Changing projects in a dossier prompt produces the error, "Unable to get property 'prototype' of undefined or null."	220117
DE82225	In Library, the option to export a document containing a grid is not available.	

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE82312	Incorrect data is retrieved from the date range "Last Year" and "This Year" when imported from Google Analytics.	220879
DE82541	After changing the data type of a metric to Time, DateTime, or Date, the metric values do not appear on a dossier in Desktop 10.10.	222337
DE82695	Enabling the "Exclude Disclaimer from Exported Reports" setting results in truncated data when there is another file tail.	222459
DE82703	Deleting an object in Developer 10.10 using MySQL 5.6 as a metadata database results in an ODBC Error.	222448
DE82722	Text box objects do not render in an Information Window after a grid Selector is clicked for a different Information Window.	213168
DE82730	User is unable to open .mstr file from network folder in Workstation 10.10 for Mac.	222456
DE82819	Dossier filters cannot be modified when using an embedded API.	220933
DE83054	Documentation does not contain mention that prompted documents are not available for bursting without first executing them.	223206
DE83194	Security vulnerabilities may occur when using Jackson Databind.	221813
DE83217	The "Next" and "Submit" button do not work on Internet Explorer when trying to add external data using the MicroStrategy Dataset Connector.	223204
DE83310	The MicroStrategy Workstation online help states that users cannot install Workstation on a machine where Intelligence Server is installed.	223156
DE83386	Grids on documents are not displayed in Internet Explorer or Edge browser.	221725
DE83414	In a database instance, a multi-table data import cube does not refresh when jobs from the primary database instance are running on the intelligence server.	221149
DE83531	Canada custom shape file provided by customer does not render shape boundaries for an ESRI map.	224135

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE83805	In Web 10.x, modifying imported data returns an error when a SessionID cookie is present on the web browser.	214061
DE84003	In the Configuration Wizard, the Server Configuration: Statistics Settings page is blank by default.	219517
DE84024	The project setting for Import Data per user is set to 20 MB instead of the expected 100 MB.	218322
DE84057	Opening Architect results in read access error.	224333
DE84117	Running the ALTER PROJECT CONFIG SCHEDULES command in Command Manager results in an error.	210315
DE84197	The Enterprise Manager report "User Performance against Governing" does not return data.	219983
DE84254	Users do not have the ability to manually insert Oracle SQL hints into a report.	224803
DE84261	The Certificate option in Developer still checks for a certificate even though the option is disabled.	224933
DE84264	Using "Edit links to dynamically answer prompts on a target report or dashboard with multiple prompts" only answers the prompts related to the attribute in question and those to the left in Web 10.4.4.	224968
DE84326	Users cannot view some areas that contain data within customized ESRI maps.	224317
DE84391	Updating from 10.8 to 10.11 causes an error when updating the schema due to an attribute definition.	223559
DE84483	Users cannot update the schema in an asymmetric cluster without loading projects on all nodes.	
DE84516	It is not possible to select multiple cells in a grid after scrolling to the right in a document.	219084
DE84737	Incorrect results appear when users perform an object search in MicroStrategy Web by attribute description.	224540
DE84840	In MicroStrategy 10.4.6, a document grid does not maximize correctly, leaving excess white space below the grid.	224770
DE84933	Running report with an embedded prompt causes an error.	225328

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE85032	Using Websphere with the portlet2portlet plugin results in an error on Internet Explorer.	225352
DE85088	Multisource datamart execution fails when using DB-II and SAP BW.	224523
DE85122	The collaboration index is not refreshed when new collaborators are added.	224773
DE85471	Changing the "greater than or equal" value in the filter options causes an error in a dashboard in 10.4.6.	226300
DE85478	Mobile 10.10 screen display is jumping (oscillating) when navigating on document.	226263
DE85522	Sort order in grid is lost after changing page-by selection, but the sort icon is still displayed on a mobile device.	222254
DE85732	In Web, when thresholds are removed, the conditional formatting disappears.	208336
DE85766	Command Manager shows a data load as correctly completed before it is finished.	226392
DE85789	User is unable to use the File > Export to PDF feature in Desktop 10.10.	226400
DE85946	An error message appears when attempting to extract data through the AWS Athena connector using a custom SQL statement.	223916
DE86246	After making a copy of a dashboard in Developer, and executing it in Web 10.4, an execute access error appears.	211403
DE86292	The Enterprise Manager Execution Duration (hh:mm:ss) metric displays 00:00:00 in out-of-the-box reports.	184356
DE86300	MDX reports stopped working after upgrading to 10.8.	209274
DE86316	Metric values are rounded for some users, but not others.	226835
DE86468	Changing selectors in documents is significantly slower in 10.4.4 than in 9.4.1 Hotfix 5.	227466
DE86542	Enabling parallel SQL execution with pre or post custom SQL in 10.7 results in an error.	221079

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE86560	When the user edits the values of a View Filter, adds values for the Qualification Filter of "In" values, and clicks Save, the second value in the list disappears.	226822
DE86569	Brackets disappear from the Metric Editor in Web when switching between the Function and Formula Editor.	223750
DE86611	Column headings do not scroll in Microsoft Edge in a report with a large number of attributes in Web 10.4.4.	226633
DE86731	User cannot select the current date on Android.	227514
DE86746	Jackson Databind 2.9.2 may result in security vulnerabilities in 10.1.	221813
DE86761	The Sales Dossier in MicroStrategy's internal Aqueduct environment is not creating caches when the security filter "Deny access" is applied on a metric.	227756
DE87201	Column width in a new personal view is not preserved in 10.4.4.	210425
DE87231	MicroStrategy Web 10.10 produces an error when using a custom data connector with an HTTPS connection and importing a .csv file.	227437
DE87252	Font of the Title Bar selector does not change in design mode in Web 10.4.6.	225348
DE87263	In Web, sorting attributes with hierarchies in Outline Mode in a Report Services Document results in incorrect values and formatting.	
DE87320	Shutting down the Intelligence Server opened in console mode with the "s" command triggers an assertion.	
DE87334	An error message appears when creating a threshold for metrics from an SAP business warehouse MDX cube.	228045
DE87397	Lost user sessions produce incorrect data inputs and updates to a table when using Transaction Services documents.	219995
DE87480	User is unable to edit subscriptions in Web after changing attributes forms used in personalized prompt answers from Desc to ID.	222624

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE87533	In Enterprise Manager, the data cannot be successfully loaded because of an error in the logic for SP_EM_IS_LAST_UPD() procedure which will cause the data load to not execute correctly when the column EM_TRACKED is set to a value of 2 in the table EM_ITEM	226043
DE87536	There is a localization mistake in Japanese Web UI.	226191
DE87675	The font size cannot be changed in a dossier with an In-Canvas filter and a slider display style.	228554
DE87865	When user imports data with Japanese kanji from an Excel file, the kanji is displayed as kanji and katakana.	228705
DE87929	In Command Manager, setting the expiration date for a Subscription using the format mm/dd/yyyy sets the expiration date as dd/mm/yyyy in Web.	226589
DE88064	Android Mobile SDK 10.10 (Android API 27) cannot be used with Android Studio 3.x.	227576
DE88092	Certificate Server client certificate does not set the "country" parameter properly.	220364
DE88123	In Web 10.10, resizing the data set panel in Google Chrome results in illegible text in the Dossier.	228524
DE88297	After scrolling to the right, to view part of a grid, applying sorting resets the scroll bars to the initial location.	227264
DE88347	Sending a report using the Send Now URL API uses the default prompt answer instead of the specified date prompt answer in 10.4.5.	225139
DE88354	Metrics that contain an object prompt, within an object prompt, placed on report objects, do not appear in the final report.	229239
DE88423	An Oracle connection fails if Oracle's Unauthorized Access Banner option is implemented.	218719
DE88455	The Time Slider Widget is not updating the x-axis correctly when using a selector.	228020
DE88463	User is unable to set up new user without a standard-authentication in a password-policy-enforced environment.	226516

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE88467	Setting up a subscription via the command manager causes an error.	228670
DE88479	User is unable to replace/delete the default available color palettes in the Web preferences for Dossiers.	226518
DE88489	Accessing a certain Dossier causes an error.	227171
DE88612	User is unable to fix metadata inconsistency with Custom ScanMD tests.	226050
DE88613	Users cannot type Japanese kanji in the comment section of Library 10.10 in Internet Explorer 11.	229371
DE88632	User is unable to save reports to My Reports folder in a certain project.	227158
DE88640	In 10.4.6, report SQL that includes comments returns an error in PostgreSQL databases.	229232
DE88726	Certain LDAP users receive a fatal error after saving a dossier to Library and attempting to view Home in Library 10.9 and 10.10.	216155
DE88730	Dossier 10.10 displays times incorrectly.	229776
DE88856	Users cannot execute older, derived elements in Web.	224842
DE88913	Deselecting a check box in a dashboard filter results in an invalid name error.	229023
DE88921	Data load takes too long during EM_USER migration.	229991
DE89047	The Org Chart visualization plugin does not appear on an iPad when using a ASP Mobile Server in 10.9 and 10.10.	229591
DE89052	Pie visualization displays values incorrectly in 10.3.	224663
DE89073	User cannot hide the Insert > Browse Objects option in Workstation.	227209
DE89077	Using ESRI Map, the County attribute does not display properly when Map Type is set to Marker.	228424
DE89170	Usher does not automatically synchronize user information from Okta.	230225
DE89217	Not filling any prompts in a document with an object prompt results in an internal error in 10.4.2 on Linux.	228155

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE89218	When connecting Desktop to Library using SSL with a self-signed certificate, the connection will fail.	224607
DE89249	In Web, when a value prompt is used in presentation mode, the edit link only works when certain attributes are selected.	230173
DE89291	Some MicroStrategy 10.4.2 apps cannot be launched on an iPhone X.	230355
DE89333	Error message appears when installing MicroStrategy 10.10 on SUSE Linux 12.3.	229651
DE89342	User is unable to login to Library after the SAML token expires.	
DE89344	In 10.4.6, documents in Edit or Design Mode become unresponsive after editing a customer-specific derived metric using the formula editor.	230517
DE89370	In Web, the metric slider does not filter data if the language is set to an international language.	
DE89399	Dossier embedded to a Web portal using i-frame has display issues when using a drop-down filter.	226945
DE89412	Documents hang during execution on AIX 7.1	229434
DE89468	When the user removes all objects and datasets, the Document XML cache size does not become as small as expected in 10.4.2.	229972
DE89487	Hierarchical attribute does not remain expanded in a Dossier after it was saved using "Save as" in 10.10.	225993
DE89490	Modifying the SQL Time Out setting on one report affects all other reports in the system.	226407
DE89493	Custom shapes do not appear in PDF exports of ESRI maps from Library.	231183
DE89494	Change Filter in Library takes a long time to load for a dossier with many attributes.	227851
DE89496	Narrowcast Server crashes unexpectedly when executing subscriptions.	231195
DE89517	In the Android Transaction Services, the calendar selector cannot select the current date.	230022

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE89573	Grid rows duplicate with an outer join to a lookup table set for a dossier based on an OLAP cube.	
DE89603	User is unable to exit from presentation mode to edit mode using a shortcut key in 10.11.	
DE89649	Replace Attribute option is not available in Presentation Mode for graphs in Dossier.	231500
DE89757	Usability issues when switching between libraries on iPad.	
DE89796	Integrity Manager tests with dynamic date prompts cannot be set to a fixed date.	224702
DE89816	When publishing a cube, Teradata Pre-SQL Query Banding is not submitted during the Discovery phase.	228655
DE89837	Document header and selectors vanish when using calendar widget.	227299
DE89893	There is a discrepancy in the SQL Server documentation for 10.4.	231748
DE89896	Conditional formatting does not work in a dossier when it is applied to sub-sections.	220945
DE89909	Dossier links do not work on the Android Library app.	208068
DE89927	Documents opened on Android do not display Objects once the device position is toggled to landscape and then back to portrait in 10.10.	231750
DE89930	Opening project configuration results in a "Project Inconsistent" error in 10.4.5.	232011
DE90021	In 10.9, the Hide Nulls or Zeros view is applied to both columns and rows when it was only meant to apply to rows.	231326
DE90061	iPhone X UI is not displayed properly.	232132
DE90099	Command Manager script does not list all members of an LDAP group after Excel export.	230526
DE90100	After applying the 10.4.0_Hotfix3_Patch33_TB1 patch on Intelligence Server 10.4.3., Developer 10.4.3 hangs when running report services documents using derived elements.	232189

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE90157	Importing data from a URL results in an error in Desktop 10.10.	232079
DE90375	User names are listed instead of schema names when connecting to Netezza in Data Import.	232252
DE90415	In Enterprise Manager, the data load is not executing correctly when the column EM_TRACKED is set to a value of 2 in the table EM_ITEM.	190579
DE90451	An attribute element is missing from a pie chart visualization.	226796
DE90462	Grid result overlaps after running certain commands at the same time.	206892
DE90504	Changing the shape of a metric to sing-dot "Line" or "Area" causes the value to duplicate in a dashboard.	230687
DE90607	An error message appears when trying to create an XQuery using SOAP from XEG.	231478
DE90618	In Desktop 10.4, importing a D3 Word Cloud visualization results in an error.	232572
DE90684	Google Maps search bar does not work.	232901
DE90713	When clearing an attribute element from a filter checkbox, the selection type changes from Include to Exclude in Web 10.9.	232926
DE90785	Translation of a document is not copied into a combined document.	231202
DE90821	Using a hash to qualify Big Decimal data type metrics in a filter results in an error message.	232807
DE90885	The Usher login mechanism does not appear when accessing Usher-enabled websites through a mobile browser.	233305
DE90917	Quickview shows incorrect Other Processing Totals in execution log	231078
DE90979	Derived attribute name is not shown when user changes locale.	231146
DE91014	Information window panel stacks in Web only display the first value from attribute selector.	233121
DE91051	User is unable to customize ESRI Map transparency setting.	232085

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE91115	In Web 10.10, exporting a Document containing custom font to a PDF changes the font.	230750
DE91120	When inserting a large number of rows into a Hive table using a multiple-pass report, only 32 rows insert at a time.	230214
DE91137	In Web SDK, API is unable to override or rename any object once migrated to the destination I-server.	228857
DE91140	Database Login in Connection Mapping keeps setting new users to default, and does not allow changing them.	222858
DE91206	When a new dossier filter is created and collapsed, it shows an additional element "None".	233034
DE91211	Editing a derived metric in Dossier sometimes removes brackets from formula.	232905
DE91217	Exporting a Web Document to Excel as a Live Excel Chart does not reproduce a horizontal bar graph correctly.	229664
DE91218	In System Manager, after executing the workflow, an incorrect personal exit code is returned in command line.	228058
DE91231	User cannot create a cube using .xls, .xlsx, or .csv files from the OneDrive for Business Connector.	233792
DE91289	Importing the Delete Object package does not delete objects with derived elements in 10.4	228005
DE91372	Warehouse catalog does not display columns when using Kerberos.	228956
DE91516	Attribute form names do not get translated in dossiers in 10.9.	228741
DE91541	An error appears when accessing the provision environment.	234265
DE91574	An error message appears when attempting to expand information about an environment in the AWS monitoring tool.	234405
DE91607	Snowflake Derived Tables require non-standard Outer-Join VLDB property settings.	231525
DE91696	User cannot delete data from a cube as they expected while running an incremental refresh report.	229653
DE91704	Narrowcast Server crashes unexpectedly when executing subscriptions.	234613

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE91707	Visualization as a filter stops working when there is a Null element in an attribute column.	233363
DE91752	Users with the "Web Reporter" privileges cannot refresh dossiers in MicroStrategy 10.10.	232236
DE91829	Attribute Selectors on Report Services Documents do not retain number formatting in Presentation Mode.	231575
DE91833	Hierarchical sorting in Web is not available for Report Services Documents.	229567
DE91871	Project Merge fails when merging a document with derived element.	227400
DE92005	When using the Advanced Sort option in the Drop Zones Editor of a D3 Visualization, an error appears.	234988
DE92008	File subscriptions revert to default selections after upgrade to 10.x.	234948
DE92090	In Web, the user can see the values of a derived metric based on a metric outside the user's permissions.	234311
DE92125	M8MulPrc crashes when attempting to connect with Snowflake ODBC driver 2.13.19.	233873
DE92128	When the user opens a certain dashboard from an .mstr file, the dashboard freezes on "Loading Data" in Desktop 10.7.	228924
DE92151	New cloud environments on AWS cannot be logged into via Remote Desktop Protocol.	235254
DE92174	When viewing two different projects in separate tabs, if only one project report is run and the other project report is canceled, the canceled report will receive an error message.	235095
DE92186	In 10.10, the Intelligence Server may fail to restart.	235314
DE92218	The credentials received from the welcome email for two environments are invalid.	235397
DE92223	"Cleartext" is translated incorrectly in Spanish.	235380
DE92233	Filter search boxes are querying for all members of a dimension in 10.10.	235028

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE92235	Error message due to governing limit in a Subset report is not specific enough.	232674
DE92236	Governing limit error message contains placeholders instead of real row values.	232674
DE92267	Dashboard does not automatically update when the user clears the number or value on a qualification-display-style metric filter.	235041
DE92275	Deleting a security role via the Web Administrator interface does not function.	235466
DE92302	Calendar Selector values cannot be passed through a link on the iOS Mobile application.	215430
DE92338	Importing an .mstr file containing a standalone database connection may fail in Desktop 10.4.	230650
DE92344	When searching for elements in a large hierarchy, search results in the Group Editor continuously change.	235349
DE92347	Hidden objects in a document are exported and displayed in Excel.	224044
DE92373	Replace option is not available in Library for Grids in Dossier.	231500
DE92375	Opening a saved Custom Group with a condition including a time format results in the date fields to appear as NaN.	231821
DE92377	Removing border lines between metric headers from a grid visualization in Dossier is not possible.	235650
DE92432	In Enterprise Manager 10.4.3, data load performance slows when migrating from Windows to Linux.	235306
DE92487	An error message appears when importing an Excel file in to 10.4.6.	235835
DE92501	When developing a new demo asset, the Intelligence Server and Metadata my crash on a Cloud environment.	235878
DE92502	Intelligence server crashes when exporting to PDF.	233181
DE92520	Entering only an underscore as a search keyword does not pull up Reports that include underscores in their title in Web 10.9.	235776

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE92536	Metrics using a case statement on a big decimal type return different result when the database record count changes.	234911
DE92551	Dossiers with a Map Widget do not show the quickinfo correctly for attributes with a semicolon.	234577
DE92693	User is unable to access reports moved to Shared Reports.	236068
DE92697	In Workstation 10.10 for Mac, text from the Query Editor cannot be copied into Data Import.	235683
DE92710	MicroStrategy services are not starting in a certain cloud environment.	236176
DE92740	After selecting an external database to import data from, a blank screen appears.	223476
DE92748	Converting a dashboard to a document, switching layouts, and triggering an information window results in a Missing Plug-In error in Web 10.4.5.	217394
DE92753	In Web 10.4.6 running on Tomcat 8, projects with special characters cannot be accessed.	236323
DE92842	User is unable to access MicroStrategy Web and Mobile.	236357
DE92844	Transparency effect does not work for InfoWindow.	229646
DE92846	Text field is truncated when importing from Twitter.	236201
DE92893	User is unable to run Baseline against a Project in Integrity Manager on 10.10.	236297
DE92894	Poor performance of search box when attributes have high cardinality or if the datasource is a Live connection.	
DE92931	An error occurs when executing the Report Service Document in editable mode if it is defined using "answer dynamically" in the link editor, and the selector is at "All" or "Null".	
DE92938	User is unable to connect to the cloud machine via remote desktop.	236273
DE93061	The graph selector cannot be deselected after the target grid is updated on Android.	
DE93077	In Web 10.10, mixing attributes from a regular time hierarchy and generated time hierarchy yield inconsistent results.	235649

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE93136	An error message appears when showing data operations on the heartbeat monitor dashboard.	236999
DE93192	The SDK App cannot launch when changing from "DPC" to "Non-DPC or DPC" setting.	
DE93199	Custom Groups used as a filter in Mobile 10.9 do not work.	236954
DE93211	Script collaborationserver.sh does not support MongoDB connection check with SSL and replica sets.	
DE93223	Cross Site Request Forgery error appears when browsing to shared reports after logging in.	202244
DE93225	Each Google BigQuery query executes twice.	236961
DE93229	Intelligence Server crashes when a user exports a grid with cells containing an image URL without the closing bracket in 10.4.6.	232855
DE93326	In Web and Developer newly copied objects inherit permissions from the target folder, and in Web alone newly saved objects carry permissions from the original object.	233142
DE93327	Object descriptions do not appear when hovering over objects in the Add Existing Objects dialog.	237057
DE93328	Null values are cut off when exporting to PDF in 10.9.	237066
DE93353	In Developer 10.8, running freeform SQL reports passing parameters with "?" against a SAP Hana database fails.	207300
DE93459	Using the heat map as a selector does not work correctly in a document with multiple selections in 10.10.	237413
DE93465	ESRI Map Widget Remove Selections option does not work in 10.10.	237452
DE93476	Exporting a report containing negative values to a .CSV file results in a single leading quote placed in front of negative numbers.	237468
DE93595	Integrity Manager does not properly add objects from search results saved in Developer.	237371
DE93596	Metadata update from 10.4 to 10.11 results in an error message due to a folder object being created at the configuration level.	237138

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE93657	Replace the 'TEXT' datatype used in Enterprise Manager DDLs as it will not be supported in future versions of SQL Server	237741
DE93663	Intelligence Server crashes in a dossier with a derived attribute linked to another attribute in another dataset while there are other links in these datasets.	237744
DE93683	Three Dossier privileges are incorrectly translated.	236163
DE93742	Enterprise Manager's automatic cleanup of failed data loads incorrectly deletes the initial row from EM_IS_LAST_UPDATE table.	236246
DE93768	When the Intelligence Server is restarted, the msireg.reg file is blank.	227788
DE93769	Export of certain dossiers to Excel is impossible.	230134
DE93781	Using OAuth with Google BigQuery throws an incompatible SQL error.	236358
DE93791	Replace with object drop down list is not completely populated when replacing a dataset in a dossier in Workstation 10.10.	237721
DE93796	The icon size shown in the tool tip on the badge design page is incorrect in Network Manager.	
DE93819	Local images are not displayed in the information windows on 10.6.	237146
DE93851	Intelligence Server crashes while executing joins in-memory because of partially uninitialized indexes.	238122
DE93869	Intelligence Server may crash with a report with attributes from multiple dimensions.	237018
DE93907	An "Invalid Pointer" error appears when editing a table and pressing the "Execute SQL" button on a dossier in Workstation 10.10.	235954
DE93947	10.10 can not render the UTF-8 emoji character set in a report.	238210
DE93986	The Android Mobile App is not able to load the Microsoft Azure MFA login page.	238073
DE94055	In Library, prompt instructions created with HTML code do not render properly.	237989

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE94081	Intelligence Server may crash while editing a cube or refreshing a manipulation in a particular dossier.	237743
DE94084	Metrics containing negative values do not appear as negative values in the slider filter on a Visual Insight dashboard.	238473
DE94105	Users are redirected to the mobile admin page when they try to open a dossier with a map visualization in the 10.10 Android app.	237598
DE94137	Linking to a saved dataset causes an Invalid Pointer error in 10.4.7.	238505
DE94172	The Calendar Filter Style is not available in Visual Insight when the attribute's first form is not DateTime.	187597
DE94212	Improve the performance of the procedure to clean user My Reports folder	155373
DE94230	There is an incorrect dependency between the privileges USEARCHITECTEDITORS and IMPORTTABLEFROMMULTIPLESOURCES using Command Manager scripts.	238492
DE94234	Instruction generation for Subset reports is slow when run against Multi-Table Data Import Cubes with a very large number of tables.	237956
DE94240	Creating a Dossier with data blending results in an unspecified error.	236969
DE94255	When exceeding the "Maximum SQL Size" VLDB setting, the SQL size in the error message is calculated incorrectly.	
DE94257	Need account credentials for mysql UNIX, and the mysql database root password for AWS.	237931
DE94285	Intelligence Server crashes when multiple users try to use the system in Web 10.10.	235924
DE94307	After running an Integrity Manager test, there are numerous SQL mismatches between 10.3 and 10.10.	
DE94311	Clicking a selector in a document with iFrame causes the page to automatically scroll down or jump so that the selector is at the top of the page.	236566

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE94322	In a database instance, a multi-table data import cube does not refresh when jobs from the primary database instance are running on the intelligence server.	221149
DE94324	Web and Library may contain security vulnerabilities due to an outdated Java library.	238851
DE94340	Product manual is not up-to-date about the supported Essbase server versions.	
DE94346	Error messages appear when trying to import large, non-CSV files in to 10.10 HGOS from the Hadoop Distributed File System.	224414
DE94406	Web is susceptible to content spoofing against project name.	238610
DE94409	After updating MicroStrategy Mobile on Android, an error appears that makes it impossible to access the app.	238711
DE94433	Web uses an outdated JavaScript library.	217881
DE94434	Integrated Authentication for Library does not work after upgrade to 10.11.	237873
DE94439	Only one-to-one mapping with a VPC and an account is available using MicroStrategy on AWS.	238834
DE94469	Mentioning another user and typing Korean characters results in text displayed incorrectly in Library 10.11.	238850
DE94480	A JavaScript plugin cannot be downloaded from 10.4 Mobile Server using 10.11 iOS app.	
DE94634	An error occurs when linking a string value with special characters to a target report	238456
DE94642	Report Service Documents configured to open in Landscape view open in Portrait view on Android.	238949
DE94651	Opening a cached PowerPoint document using the multimedia widget on Mobile results in an error.	237230
DE94652	Multi-select options do not appear in a custom iPad app.	225227
DE94663	Operational layers for a custom ESRI cloud map are not shown in either the properties panel or the toolbar (Styles selector).	239369

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE94709	Dossier using a Live Connection ignores Cartesian Join Settings if the database instance is not set as the primary in Project Configuration.	235494
DE94741	In Mobile for iOS, drop-down selector shows blank elements when passing the selector value from a portrait document to a landscape document, although the selector has actually been applied to target grid.	235992
DE94773	ScanMD may fail to run.	239050
DE94878	When running a document with ESRI Map on an iPad, the location markers appear in different locations when the information captured is from the same location.	239749
DE94928	Metrics formatted in [h]:mm:ss do not appear correctly when they contain negative values.	233061
DE94942	Developer unexpectedly exits when generating Project Documentation.	239450
DE94987	Bar graphs do not appear on the Android Mobile application 10.4.	239893
DE95008	When creating a derived element from a Big Decimal datatype, the precision of the Big Decimal datatype is lost.	239941
DE95063	Setting the timezone to GMT+5 (Pakistan/Lahore) does not work in Web 10.10.	239974
DE95068	Machines set up with 10.10 are constantly reaching memory issue.	238448
DE95128	Group attribute and derived calculations are not showing data in a grid.	237510
DE95164	Intelligence Server crashes under concurrent executions due to a missing memory lock.	239313
DE95166	User cannot access the Intelligence Serving using VNC.	240170
DE95234	In Enterprise Manager, if projects in a UAT environment have the same GUID as projects in a PROD environment, only data from one project will appear.	240218
DE95251	Scrollbar does not allow scrolling in the individual custom sorting editor.	239331

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE95258	Font differs among browsers in Dossier 10.11.	240215
DE95261	Derived metrics and attributes are duplicated in a document in 10.10.	239509
DE95273	After defining local security filters on an MTDI cube, the security filters are applied to the entire project.	239476
DE95280	Intelligence Server crashes after executing a certain dashboard in 10.4.6.	238648
DE95315	Loading takes a long time after selecting the table of contents in Library 10.11.	238395
DE95337	When building an application for iPhone in Web, changing the navigation bar color to white appears grey on Mobile.	239649
DE95344	In a document, selecting text with a Javascript function in its link definition causes page loading to fail.	239198
DE95376	After changing the slice filter and targeted transition fields multiple times, the database table has multiple entries.	238214
DE95409	Exporting a dossier with a map visualization, including markers, to a PDF does not render correctly when German, French, or Spanish language preferences are selected.	238101
DE95421	User is unable to share a link to a Dossier in Library 10.11 using Kerberos authentication.	240563
DE95453	Integrated Authentication for Library does not work after upgrade to 10.11.	237873
DE95484	Configuring the Collaboration Server to SSL on Tomcat does not cause the Library application to start.	237527
DE95498	Intelligence Server and Web Server crash when running Integrity Manager in 10.8.	240087
DE95521	Intelligence Server may crash when projects are frequently reloaded.	204868
DE95632	Intelligence Server reaches 100% CPU and becomes unresponsive; at same time hundreds processes get constantly created and deleted.	237538
DE95634	Dates are shifted one month ahead in annotation and chart in Google annotation chart 10.10.	241040

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE95730	Funnel chart visualization does not work as a selector in 10.10 Desktop.	241194
DE95752	Local web server connected to an AWS Intelligence Server does not show any projects in Web.	239170
DE95759	User cannot view Filter Elements longer than 25 characters in Web 10.10.	233118
DE95763	Google Sankey visualization does not work as a selector in 10.10 Desktop.	241315
DE95772	Intelligence Server crashes when shutting down a process caused by multi-thread issue in cancelling a job.	240032
DE95823	Data import fails when there are comments and Unix line-break character "\n" in the SQL Query for Windows Intelligence Server.	240804
DE95840	Subtotal background colors are changing even after defining a specific color at each attribute level in display mode in Web.	227876
DE95872	Google org Chart visualization does not work as a selector in 10.10 Desktop.	241306
DE95889	JBOSS installation only shows option for Tomcat, even though other Application Servers are supported in 10.10 Library.	241532
DE95906	User gets an incorrect file location link in the notification email of a file subscription when the path has the space character in 10.4.6.	238527
DE95916	In Web, after modifying the color of a Parallel Coordinates Charts, it only exports in black and white.	241236
DE95936	Error occurs when adding another cube or external dataset in 10.4 Dashboard.	232865
DE95941	D3WordCloud custom plugin widgets do not work on Report Services Document on iPhone Devices with iOS 10.11 app.	238950
DE96009	Editing scripts in Data Wrangling deletes scripts applied afterwards in 10.10 Web and Workstation.	237867
DE96011	Bubbles in ESRI map are not displayed when all values are less than 0 in iOS.	

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE96019	Error message appears in Sequences Sunburst Visualization in 10.10 Desktop and Web.	241342
DE96062	Error occurs when trying to run cube report based off Excel file published by a different user when option "Create Intelligent Cubes by database connection" in Project Configuration is enabled in 10.4.6.	241528
DE96118	"Use default value" is always "False" for each preference, even when the preference has been assigned the default value using the LIST ALL WEBPREFERENCES command.	241874
DE96164	The Enterprise Manager DB2 warehouse upgrade script inserts queries that were intended to be commented out for IS_REP_FACT after upgrading to EM version 10.10	240571
DE96279	If a user does not have the "Create Schema Objects" privilege, they can read a dashboard with derived attributes created by another user but cannot save their own version of the dashboard.	210824
DE96335	KPI widget error message does not appear in Library.	
DE96350	Intelligence Server crashes when there is an ambiguous component metric in a smart metric.	241792
DE96418	Reprompting fails in a newly created dossier based on a SAP BW cube with a prompt before saving a dossier.	241782
DE96427	Log file generated in a script in System Manager displays user name and password in clear text.	236394
DE96477	In Presentation Mode, it is difficult to use the scroll bar on a dossier.	238955
DE96483	Trying to connect to the environment using Remote Desktop Protocol or Guacamole results in an error.	242486
DE96517	URLs contain a second question mark in Web.	242365
DE96519	Execution results of a dashboard are different when built with differing create and save methods.	241843
DE96587	Incorrect data is displayed when using a derived metric for "Last" in a live connected dossier using a database that does not support the function "Last."	240768

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE96627	No scroll bar appears when replacing dataset in Web.	242681
DE96631	Export to Excel 2007 does not format cells with numeric values as numbers.	240457
DE96641	In a Report Services Document, using a Word Cloud out-of-the-box visualization results in an error.	242713
DE96680	Bubbles in Map widget are displayed as one size regardless of metric value on Android devices in 10.11.	241632
DE96689	10.11 Web Dossier fonts are different in Internet Explorer as compared to 10.11 Chrome and 10.10 Internet Explorer.	242827
DE96702	Searching "\" in the Attribute element prompt in Dossier crashes the Intelligence Server.	
DE96737	New group in Filter panel in Visual Insight does not expand.	232827
DE96738	Exiting an unsaved dossier, created using data from a data connector SDK, results in a frozen waiting screen.	242178
DE96740	10.11 does not show a warning message when modifying an installation to remove MySQL on Windows.	242600
DE96741	Activating TouchID in the 10.11 Mobile configuration prevents D3 from working.	240764
DE96744	Base Attribute FormCOM interface error appears when updating schema in Developer 10.4.	239721
DE96793	iOS app 10.11 authentication process with Usher prompts for further Usher authentication with TouchID.	241757
DE96817	Intelligence Server crashes when a private report's data template is a shortcut to a standalone template, but its view contains an attribute that cannot be found in the data template.	
DE96879	ESRI Map on Android Device relocates the Information Window.	
DE96912	Command Manager fails to fully republish the Multi-Table Data Import cube when using Delta XML.	243163
DE97025	Filter Panel checkboxes are cut at the bottom in Web 10.11.	242382
DE97035	Maximum file size import setting is limited when applied via Command Manager in 10.4.6.	243356

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE97047	User cannot connect to an environment from a remote computer.	242486
DE97050	Calendar Prompt in Android app set to French does not allow to select any date.	242700
DE97068	D3WordCloud is truncated and the tooltip does not work properly in Dossier's Custom Visualizations in Desktop 10.11.	243440
DE97071	When metric formatting uses parenthesis for negative values, incorrect values are displayed in the Report.	233078
DE9711	After clicking "Show Data" and then closing the dialog, the dashboard will fetch data again.	
DE97273	Threshold selector does not refresh the bubble color in a bubble map.	241560
DE97406	New provisioned instances of a specific environment from Secure Cloud do not have cubes.	240170
DE97545	Dossiers exported to PDFs lack pagination and get truncated to a maximum of a single page per cell.	243889
DE97547	Restoring Amazon Web Services from backup files may fail.	243964
DE97557	Visualization Builder clears any code changes made after replacing a dataset.	244028
DE97574	REST API authentication login does not generate authentication token using Trusted Authentication mode.	
DE97613	There is a security vulnerability detected in 10.3 up to 10.11 installation of Intelligence Server.	244076
DE97642	In Web 10.10, using a link from another dossier to open dossier in library results in a distorted screen appearance.	244140
DE97659	iOS app crashes when updating or deleting a comment.	238482
DE97704	Custom font does not apply to selectors on MicroStrategy Mobile.	244061
DE97721	Intelligence Server terminates after enabling the shortcut option in 10.4.6.	243380
DE97722	Wrangling data imported from SalesForce results in an error.	244253

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE97751	User's maximum quota for Data Import is reached even though actual usage is lower than the quota.	244369
DE97755	In Mobile 10.11, hyperlink tags in an HTML container are not working on an iPhone.	243911
DE97764	Users with expired MicroStrategy passwords can login using Usher QR code access even though Usher is configured to use MicroStrategy User GUID and not LDAP.	242773
DE97771	Dossier chapter tabs are displayed incorrectly.	243676
DE98004	JavaScript error occurs when pressing the logo menu on document prompt page, as well as on document and report export page in 10.10.	244662
DE98068	Two different visualizations using the same metric illustrate different data labels.	244691
DE98140	Implicit Table Type VLDB setting returns SQL that is not accepted by Google BigQuery.	242529
DE98193	Custom formatting of a metric is not applied to a graph visualization in Dossier.	244956
DE98195	After importing a table from an Exasol Database into a project, columns with decimal datatypes are mapped as integers instead of decimals.	244974
DE98210	After upgrading from Web 10.4.3 to 10.4.7, editing SQL code to delete two lines of code ultimately erases all SQL code.	243132
DE98226	Drilling in a cube results in an error.	231826
DE98276	JavaScript error occurs in Web 10.10 when trying to navigate to a different project using the logo drop-down menu.	244636
DE98289	Adding users to new or existing roles or privileges does not work.	244870
DE98302	Command Manager WeekDay schedule triggers on Weekends.	244103
DE98325	Configuring Intelligence Server for Kerberos Authentication on Linux may fail.	241129
DE98395	In folders containing exactly 31 attributes or metrics, the 31st object does not appear in "All Objects" panel lists in Web.	244771

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE98499	Data wrangler in 10.3 does not support IPv6.	159963
DE98516	Font styles are repeated when changing value in a selector in Internet Explorer.	244157
DE98528	Intelligent Cubes set for hourly refresh become duplicated on opposite nodes.	230830
DE98633	Custom Formatting does not apply the derived elements.	234106
DE98641	The default schedule "All the Time" for new installations and deployments on AWS has a 2010 end by date.	245104
DE98670	In Command Manager 10.4, the project name is blank when running the "LIST ALL INTELLIGENT CUBE CACHE" command.	245693
DE98672	Accessing information from a SaaS data source of ServiceNow using an SSL connection results in an error in 10.11.	243282
DE98688	Passing GroupBy Values from one Report Service Document to another does not work when linking between documents with Link Editor or URL API.	217503
DE98739	In Command Manager, different users with the same full name cannot be imported.	245611
DE98795	After upgrading from 10.5 to 10.11, it is no longer possible to ensure a Report's original positioning in the templates.	245221
DE98820	Natural language recognition feature does not pick object name that includes a special character followed by a space in 10.11.	245101
DE98821	Natural language recognition feature does not pick object name that includes a special character followed by a space in 10.11.	245101
DE98891	When trying to run a document, an undefined error message pops up.	245037
DE98949	After installing Desktop 10.11, mapped drives do not appear when trying to import data from disk.	239418
DE98970	Fiscal months are sorted alphabetically instead of by month in Web on an iPad.	245323

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE98972	Intelligence Server crashes when user deselects all the elements in a filter in a dossier.	245274
DE99046	Documents load incorrectly when opened on iPad in 10.11 iOS app.	237840
DE99158	Attempting to delete a Dossier in Library results in an error.	245751
DE99181	After importing an Excel sheet to Desktop or Web, the column headers do not match the correct columns.	246401
DE99194	Link to a documentation article does not work.	246242
DE99250	In Desktop 10.11, connecting to the Google Big Query Native API connector results in an error message.	241748
DE99254	Number formatting does not apply when a Derived Elements if formatted in a report used to create a dashboard.	233884
DE99258	Data stops displaying in graphs when using two filters and the "Hide document grid" option is selected in 10.4 HF7.	243150
DE99275	There is an invalid link to the GIS Integration Help in MicroStrategy Help 10.11.	246551
DE99289	User is unable to sort hierarchically using Quick Sort on a grid when subtotals are enabled.	246370
DE99290	There is a filter order discrepancy between Dossier and Library due to filter-targeting.	246201
DE99303	After enabling them, the Performance Counters XML Generation Time and HTML Generation Time are not collected.	244030
DE99310	Cascading filter does not work.	245280
DE99407	After importing an object manager package through Command Manager, the comment section in the change journal of an object is not updated with package name.	245614
DE99416	Exporting a large grid to a .csv file returns an error.	244136
DE99451	Searching for Intelligent Cubes does not yield any results unless the "Object Type" is changed to only show Intelligent Cubes.	245187

MicroStrategy Internal ID	Description	MicroStrategy Support Case
DE99459	User is unable to migrate the "Do not expire cache" option of a project from one environment to another.	243425
DE99487	An invalid .pem file disables pinning certificates in iOS.	241237
DE99577	User is unable to securely enable JMX remote access.	247001
DE99583	In a dossier, using a non-aggregated metric returns incorrect values when running multiple templates in different chapters.	246954
DE99623	In Internet Explorer, using the Ctrl key to select multiple attributes in MicroStrategy results in an error when the same attribute is selected multiple times	245117
DE99636	User cannot scroll the page correctly in Library on Android.	246653
DE99648	The mobile dossier interface does not change when changing screen orientation on an Android.	246655
DE99806	Updating schema results in an error.	246741
DE99853	HTML code does not correctly export to PDF when color code is used in a document.	247390
DE99896	Intelligence Server crashes when user runs documents which contain intermediate rows exceeding the system limit.	247074
DE99920	User cannot connect to Amazon Athena using the Amazon Athena 2.x JDBC driver.	247665
DE99936	Dossier owner name is displayed differently in Library and Web.	247260
DE99945	Library home page throws an error, but the user can still access Library after dismissing the error message.	246230
DE99972	Once the Android Library application is connected to an AWS Library, the demo dossier disappears.	247711
DE99996	Some open source components of MicroStrategy installer contain critical vulnerabilities.	245422
US101974	Add ability to create live-to-schema datasets by toggling from in-memory to live connection in Dossier Authoring.	
US102705	Enhance DSS Error logs by including specific information such as object-id, session-id, and others tomake troubleshooting easier for customers and support.	210012

MicroStrategy Internal ID	Description	MicroStrategy Support Case
US103379	Add ability to share a dossier with all users who are enabled in metadata.	
US103664	Certify the Amazon Aurora PostgreSQL as Gateway for Microstrategy products.	215646
US103823	Export mapbox in the PDF as a map and allow base maps and data points to be exported as well.	
US104355	Ability to create a derived element using an element on the lowest level of a hierarchy.	217828
US106084	Add an element selector with hierarchical structure for derived elements in the calculated member editor.	220934
US106087	Ability to limit the levels of a branch for dynamic selection for hierarchical attributes in a dossier.	220911
US106981	Add the "Use Workstation" privilege to project login check in Object Manager.	
US106982	Add "Use Workstation" as a new privilege that grants users access to the product.	
US106985	Add new "Use Workstation" privilege to OOTB security roles in Object Manager.	
US106998	Add the new privilege "Use Workstation" to grant users access to the product in Command Manager.	
US107666	Add the ability to use the same application type as Mac Workstation during session creation in Windows Workstation.	
US107796	Add ability to change user ACLs for browsing the Hadoop Distributed File System using the Hadoop Gateway.	224433
US107948	Update mobile SDK to use the AppConfig apps- including AirWatch SDK mobile apps.	225066
US108693	Add ability to change attribute forms on derived attributes in dossiers.	227456
US108751	Remove "Use Workstation" privileges in Object Manager.	
US108775	Decrease load time for visualizations after converting a dossier to a document.	226754

MicroStrategy Internal ID	Description	MicroStrategy Support Case
US109550	Improve Web Services XQuery retrieval process to retrieve thousands of records without timing out.	228336
US110051	Add SDK support for the Library application on iOS.	
US110079	Create data connector for Amazon Aurora PostgreSQL.	
US110102	Add ability to create Intelligence Server session variables by creating a new system prompt.	191839
US111289	Add ability to create a calculated member successfully with blank space before and after the MDX statement.	229381
US112320	Reduce the time it takes to render a dossier embedded using the Javascript API.	224506
US113440	Add a visual indicator while data connector is waiting for Intelligence Server to finish executing a job.	232324
US114308	Enhance functionality of Mobile 10.9 on iPhone X.	230355
US114557	Add additional base maps that appear in the style dropdown on the map visualization in Web.	227493
US114763	Enhance functionality of Mobile 10.9 on iPhone X.	230355
US115233	Add new security roles and user groups that allow administrators to identify if users are under compliance to the metadata.	
US115236	Add new "Use API" privileges.	
US115244	Match sorting in group editor with sorting in underlying grid in dossier.	235859
US115932	Add ability to have different levels of statistics for Platform Analytics and Enterprise Manager without affecting each other's functionality.	195012
US115934	Decouple settings in Enterprise Manager and Platform Analytics.	195012
US116061	Add a row limit of 1000 to the "Execute SQL" button on Google Big Query for the "Type a Query" and "Build a Query" options during preparation phrase.	237000
US116087	Display the 'Use API ' privilege in GUI.	

MicroStrategy Internal ID	Description	MicroStrategy Support Case
US116103	Create visualization that run independent (live) queries to the data warehouse by creating datasets from existing schema objects and selecting whether they are In-Memory or Live Connection.	
US116104	Add the ability to create "Live-to-Schema" datasets by toggling from "In-Memory" to "Live" in the "Add Data from Existing Objects" dialog in Dossier Authoring in Mac Workstation.	
US116224	Implement high availability for collaboration server to run on multiple machines behind load balancer.	
US116775	Merge the Mac and Windows Workstation application type.	
US116803	Certifiy Azure Analysis Services to allow Azure Analysis Services customers to use MicroStrategy.	
US117014	Require users to log in using the "Use Library Web" privilege.	
US117030	Upgrade Spring Framework due to critical vulnerabilities in Export Engine.	
US117265	Add ability to dynamically load JS and CSS files in Web, which are required by particular dossiers.	
US117332	Enforce the "Use Library" privilege during user login.	
US117431	Add new security roles and user groups that allow administrators to identify if users are under compliance to the metadata.	
US117432	Implement the Intelligence Server compliance check for Reporter.	
US117433	Add Intelligence Server compliance check and User Audit for the Reporter privilege.	
US117568	Display AirPlay messages for dossier on iPhone X.	229525
US117635	Certify Denodo V7 as a supported platform.	239016
US117669	Enable full-screen experience for portrait mode on iPhone X, dynamically position content under status bar based on device type, and constrain interactive components within safe area.	229525
US117670	Avoid designs overlapping with status bar and home indicator when in full screen on iPhone X.	229525

MicroStrategy Internal ID	Description	MicroStrategy Support Case
US117676	Load extra information from CDSSUserRuntime and propagate to Connection String.	191839
US117807	Add new "use reporter" privileges in object manager.	
US117808	Add the "Use Reporter" privilege in Developer.	
US117809	Add the "Reporter" privilege group to Web.	
US117812	Implement the new "Use Library" privilege when user opens a shared link.	
US117839	Enable dynamic location-aware access on the JavaWebAPI layer.	191839
US118044	Display elements in the filter panel as selected when searching for the elements.	240528
US118160	Add ability to have different levels of statistics for Enterprise Manager and Platform Analytics without affecting each other's functionality.	195012
US118461	Modify the scrollbar functionality in custom sort editor to scroll the entire page length.	239331
US118488	Add new "Use Workstation" privileges.	
US118494	Add application types for all client Tools.	
US118566	Add the ability to review all mobile iOS clients and check if they have their own application type defined for it.	
US118567	Add "Use Workstation" privileges to grant users access to Workstation.	
US118569	Add "Use Workstation" privileges in Command Manager.	
US118607	Ensure all Android clients have their own application type defined.	
US118676	Show "Use API" privilege in the Developer User Editor and Security Role Editor.	
US118685	Add the "Use Reporter" privilege in Developer.	
US119383	Allow the hardcoded server and port for the Tableau data connector to be edited in the interface.	240275
US119783	Certify horizontal cluster in Web.	

MicroStrategy Internal ID	Description	MicroStrategy Support Case
US119869	Enable gzip in Tomcat installation for Library web server.	224506
US120438	Configure settings for the Library server using the Library Android app.	243788
US120516	Add "Use Workstation" and "Use Desktop" privileges in Command Manager.	
US121977	Enhance filter display style options for hierarchical attributes using the drop-down style.	
US122031	Enhance filter display style options for hierarchical attributes with drop-down style.	
US122033	Add a drop-down style option in the Display Styles for hierarchical attributes.	
US122266	Clarify the tool needed to find the recursive dependent objects list and their path.	247503
US122272	Add a separate logic for "Enable Basic Statics" for Enterprise Manager and Platform Analytics.	195012
US122572	Remove the load license telemetry admin tasks from Developer and Command Manager.	195012
US123079	Ensure that there is no functional break after introducing hierarchical attributes with drop-down style on mobile.	
US123133	Add ability to turn off the metrics cell on a grid visualization.	
US123140	Minimize the number of ports Node uses.	247009
US123219	Certify Azure Analysis Services to allow Azure Analysis Services customers to use MicroStrategy.	
US124476	Increase size of JSON file to improve plotting data at zipcode level in MapBox.	245430
US124730	Implement the new "Use Workstation" privileges during user log in.	
US125008	Implement the new 'Use API' privileges during user log in.	
US125009	During user login, users must have either "Web User" privileges or "Use Reporter" privileges.	
US125353	Add ability to cancel reports during execution without leading to slow performance.	

MicroStrategy Internal ID	Description	MicroStrategy Support Case
US125566	Add the ability to audit contact licenses after all required users are audited using the License Manager tool.	
US125576	Add ability to upgrade Metadata from Oracle 11g to 12 without the need to duplicate projects.	252227
US127000	Add documentation on how to set up collaboration server clustering (both horizontal and vertical).	
US128206	Improve rendering consistency of Report Service Documents in Library 10.11.	254394
US129468	Add documentation about setting up Collaboration Server clustering (both horizontal and vertical).	
US21331	Certify Apache Kylin data source.	
US23217	Add a user-based or role-based search suggestion pool to allow for better security of object names.	
US34568	Add ability to configure the data wrangling network port.	
US56408	Certify Stratio Crossdata as data source for the MicroStrategy Platform.	124138
US60290	Add ability to have IS NULL or IS NOT NULL in filtering conditions while in-memory and database behavior stay consistent.	
US60425	Add ability to make a sub-tree level selection on different levels.	132858
US74383	CUSTOMER/INTERNAL DEFECT TRACKING ONLY	
US78037	Add NM URL to Usher Admin Badge invitations to enhance functionality.	166956
US78987	Add indentations next to derived elements based on their hierarchy level in the editor.	168727
US79570	Add ability to check the time required to execute a CSI query pass.	169074
US80381	Allow correct data import of dates in DD/MM/YYYY format.	119992
US89352	Support VLDB properties settings in Dossier.	
US93836	Add ability to create Intelligence Server session variables.	191839

MicroStrategy Internal ID	Description	MicroStrategy Support Case
US95024	Reverse the behavior of search box selector to its original version to include auto-submit search.	195104
US96126	Add ability to grant the user admin privilege to the system manager.	194684
US98410	Add a drop-down style option in the Display Styles for hierarchical attributes.	202909
